

## Phishing Email Analysis Report

This report summarizes the analysis of a phishing email suspected to impersonate PayPal.

### Key Findings:

- Spoofed sender address: `notify@secure-p4ypal.net`
- Mismatched URL: Link text says `paypal.com` but leads to `secureverify-login.com`
- Urgent language: 'Failure to verify within 24 hours...'
- Grammar issues and suspicious domain name
- IP origin and mail headers do not match legitimate sources

### Conclusion:

The email is highly likely to be a phishing attempt aimed at credential theft via a fake login page.
